

DIY Furniture 2

BY CHRISTOPHER STUART

T12

SIMPLE + FUN

The T12 light is an exploration in form and material. The light is designed from readily available, standard parts, combined with solid black metal and a soft fabric cord. The project was an experiment using pre-made parts, most of which can be found at Home Depot or any home improvement store. The entire piece is easily disassembled/reassembled, constructed with magnets and screws for components. These design features allow for quick assembly and accessories for flexible styling, perfect for any occasion (like the design had a lovely comeback). With changes in wood choice, or metal finishing, the end result can entirely fit your unique aesthetic. Once the T12 is built a beautiful glow. The base is made to sit on a wooden peg, so the light comes to life. The sleek, modern, minimalist light is perfect with industrial design materials, modern, rustic, and applications for an industrial project.
